

THE "FIELD OF DREAMS" STORED AT DIXIE MILL

On Friday, January 21, we got the call, "if you can store it, we can have the Superdome Turf! "

Brian Bordanick has been working on building a football field for Carver High School since he taught there as a "Teach for America" volunteer. It's getting closer to a reality, and with the superdome turf, it just might put it over the top. As Brian said, "not having to buy the field is equivalent to a \$400,000-\$500,000 savings which can build our stands and lights.

Brian is in the process of building the kids in the lower 9th ward a "Field of Dreams." He started with a great idea, and his inspiration and will power are making it happen. Dixie Mill is very happy to be able to help him in this endeavor.
